

! Important Notice for the Installer

THANK YOU

Maibec would like to thank you for your confidence and we appreciate having you as one of our privileged customers.

Genuine Wood BRUSHED Face Siding

Maibec Natural tones and solid colours

The brushed face is achieved through a unique brushing process. It is available in Maibec Natural tones and selected solid colours. **Variations may occur in texture and colour from one board to the next, or on the same board. These variations are part of the desired natural wood appearance.** Once the siding is installed, these variations will blend into the wall. Rest assured that these variations are not a manufacturing defect.

During installation, take note of these variations when arranging the boards on the wall. For a harmonious look, avoid installing several boards with a more pronounced texture together in a small area.

The stain on the brushed face siding is warranted against cracking, peeling and blistering for 8 years on the Natural tones stain and 10 years on the solid stain including labour for the first 3 years. This warranty is conditional upon following the installation and storage requirements, as well as the maintenance requirements described in the Maibec maintenance guide. As a result, and depending on the siding's exposure to the elements, the

owner should expect to re-stain (2 coats) Natural tones siding within 6 to 8 years of installation, and solid colour siding within 8 to 10 years in order to maintain the product's original appearance.

For full details, consult Maibec's installation and maintenance guides at maibec.com under the "TECHNICAL INFORMATION" tab.
