<ul style="list-style-type: none"> <li>- Natural (unstained)</li> </ul>	#2 R&R (resquared and rebutted)	7/16**	3"-12**	18**	Sidewall use

▶ Also available in 24" Natural Royal Shingles

## General Specifications

### SPECIES:

- Western Red Cedar – *Thuja plicata*

### MANUFACTURING

- Kiln-dried to 5% moisture content

### PACKAGING AND COVERAGE

- Full carton covers approximately 50 sq. ft. at 7" exposure
- Half carton covers approximately 25 sq. ft. at 7" exposure

### AVAILABLE COLORS

- Maibec solid stain color chart
- Semi-transparent Spice series
- H2BO water-based bleaching stain
- Primed White/Gray (oil or water-based)
- Unlimited choice of solid colors thanks to our TrueMatch® system

### AVAILABLE FINISHES

- Regular: Clean sawn faces
- Sanded: Sanded on one side (Sanded will impact butt thickness)
- Grooved: Machine grooved

### FACTORY-STAINING

- Every shingle is factory-coated on all sides in a controlled environment for maximum stain absorption and retention. This also provides increased protection from the damaging effects of the sun and the elements.
- Following the stain application, the shingles are sent through a state-of-the-art drier for curing. Developed using European technology, this drier cures the stain from the inside out. The shingles are then cooled down and packaged. This unique system increases the durability of the product once installed.
- Low-volatile organic compound (VOC) water-based stains.

For exterior use only.

\* DIMENSIONS MAY VARY DUE TO KILN-DRYING.

# Western Red Cedar Shingles

## Installation

### FASTENING 1" ABOVE THE BUTT LINE OF THE SUCCEEDING COURSE

For a 7" exposure, fasten the shingle 1" above the butt line of the succeeding course, resulting in a distance of 8" from the base of the shingle. This ensures compliance with the installation requirement.

See the Maibec Shingles installation guides for all installation requirements.

## Installation System

### STAPLES

- Stainless steel with minimum 7/16" crown, minimum 16 gauge

### NAILS

- Stainless steel or hot-dipped galvanized nails (do not use electrogalvanized)
- Ring shank blunt tip nail with minimum 7/32" head

## How to Calculate

### HOW TO CALCULATE THE AMOUNT OF SIDING NEEDED

Example – Area to cover: 1,000 sq. ft.

**For 7" exposure, add 3% to the area to cover**

1,000 sq. ft. x 1.03 = 1,030 sq. ft.  
1 box = 50 sq. ft.  
1,030 sq. ft. = 21 boxes

## Shingle Coverage Chart

SHINGLE EXPOSURE	APPROX. SQ. FT. COVERAGE PER HALF CARTON	APPROX. SQ. FT. COVERAGE PER FULL CARTON
5"	18	36
5 1/2"	19.5	39
6"	21.5	43
6 1/2"	23	46
7"	25	50
