

Genuine Wood  
Siding

## SPECIAL REQUESTS

# Have a special request for your wood siding project?

Maibec offers custom solutions beyond its standard product range to meet your specific needs. Here are a few examples:

### MicroPro Sienna® Treated Wood siding

MICROPRO SIENNA® TREATMENT provides long-lasting protection against fungal decay and termite attack. It uses a micronized copper preservative that reduces fastener corrosion, delivers a rich, natural tone, and extends the lifespan of our genuine Maibec wood siding—even in the harsh conditions of the Great North.

#### Looking for a specific colour?

MicroPro Sienna® treated wood can also be factory-stained to match your vision.

### Additional Paint Coats

For certain projects using Genuine Wood Siding or Cedar Shingles, adding extra coats of paint can provide enhanced protection against the elements.

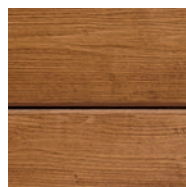

While the warranty remains unchanged, Maibec offers the option of a third or fourth factory-applied coats.

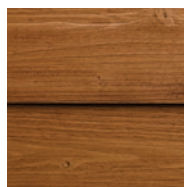

Available in Maibec  
em+™ installation in  
**4-inch profile**
